Fifteen-year Index To Systematic Zoology

1952-1966

VOLUME 16 JUNE 1967 SUPPLEMENT TO NO. 2

Mailing date: June 30, 1967

Systematic Zoology

RICHARD F. JOHNSTON, *Editor*
DAVID M. NILES, JAMES D. RISING, *Assistant Editors*

Editorial Board

1967 A. J. CAIN, P. R. EHRLICH, W. B. SCOTT, R. L. WENZEL
1968 J. O. CORLISS, J. A. PETERS, R. K. SELANDER, R. D. TURNER
1969 E. M. HAGMEIER, H. VAN DER SCHALIE, D. E. JOHNSTON, G. A. SCHAD

SYSTEMATIC ZOOLOGY is published quarterly, in March, June, September, and December, by the Society of Systematic Zoology. Manuscripts, correspondence about the contents of the journal, and other editorial matters should be addressed to the Editor, Richard F. Johnston, Museum of Natural History, The University of Kansas, Lawrence, Kansas 66044, U.S.A.

Annual dues for members are $6.00 and include subscription to *Systematic Zoology*. Subscription rate to non-members and institutions is $8.00. The price of single numbers when available is $2.00. Back volumes are available at the rate of $8.00 per volume when in stock. Correspondence regarding subscriptions, purchases, non-receipt, and other non-editorial business is handled by the Secretary, Ronald W. Hodges, Society of Systematic Zoology, c/o U. S. National Museum, Washington, D. C. 20560, U.S.A. Correspondence concerning membership and other aspects of Society affairs should also be addressed to the Secretary. Changes of address should be sent to Allen Press, Inc., 1041 New Hampshire Street, Lawrence, Kansas 66044, U.S.A.

The Society of Systematic Zoology

OFFICERS FOR 1967

President ..... ROBERT L. USINGER
University of California

President-Elect ..... PAUL L. ILLG
University of Washington

Secretary ..... RONALD W. HODGES
U.S. Dept. of Agriculture

Treasurer ..... MEREDITH L. JONES
United States National Museum

Program Chairman ..... ROBERT P. HIGGINS
Wake Forest College

THE COUNCIL

J. W. DURHAM	1967	G. L. VOSS
J. O. CORLISS	1968	C. L. HUBBS
R. L. PETERSON	1969	C. J. GOODNIGHT
H. W. LEVI	1970	R. F. INGER

and *ex-officio*, the President, the President-elect,
and the three most recent Past-presidents
(E. Mayr, H. M. Smith, R. W. Pennak)

Second Class Postage Paid at Lawrence, Kansas, U.S.A.

Systematic Zoology

INDEX TO VOLUMES 1–15

1952–1966

ISSUED 1967, LAWRENCE, KANSAS U.S.A.

FIFTEEN-YEAR INDEX TO SYSTEMATIC ZOOLOGY (1952–1966)

GEORGE W. BYERS

At their annual meeting in December 1965, the Council of the Society of Systematic Zoology requested that the editor prepare a cumulative index to the first fifteen volumes of *Systematic Zoology*. It has proved most convenient to make separate indexes for authors and for subjects and titles, which follow in that order. In both indexes, a reference lists volume number, then page number(s); thus, 14: 144, 346 means the subject will be found on pages 144 and 346 of volume 14.

The subject index has been compiled in general from titles. All full titles of papers or notes, etc., have been indexed by first word, except that articles (a, an, the) have been moved to the ends of titles. Then all other key words in each title have been indexed, as have also subjects indicated but not named in titles. Where deemed appropriate, subheadings and subjects secondarily dealt with have also been indexed. An effort has been made to make entries sufficiently detailed that the reader can distinguish those in which he is particularly interested.

There are a number of subjects treated so often in systematic papers that every occurrence of them could not reasonably be separately indexed. Thus, "subspecies" is indexed for those articles dealing particularly with the concept of subspecies but not for those papers in which the idea of subspecies is only peripheral to the main subject.

Similarly, since many articles contain faunal lists or may otherwise make only brief mention of a number of species, no attempt has been made to index all species names. When a taxonomic name of any categorical level appears in a title or is discussed in some detail, it is indexed, except that specific names are found only under their respective genera.

I would like to thank Miss Patricia Blackburn and Miss Elizabeth Gibson for assistance with typing and copyreading.—G.W.B.

INDEX TO AUTHORS

Alexander, R. D. 11:53, 12:202
Allen, J. F. 3:140
Allison, E. C. 9:47
Amadon, D. 15:54, 245
Anderson, S. 14:344, 15:189

Serology, systematic 2:19
Serum protein electrophoresis in mammals—taxonomic implications 8:88
Serum protein, variation of, in deer 11:131
Sexual dimorphism, in flycatchers 15:76
Sexuality, origin of 4:145
Shrews, population variation and hybridization in 4:21
Shrimp (Penaeidae), generic names of 6:98
Sibling species 11:122
Significance of asexual reproduction, the 3:26
Silver impregnation technique, for staining ciliate Protozoa 5:71
Similarities, structural and functional, terminology of 11:186
Similarity, ancestry, and scientific principles 8:165
Similarity and recency of common ancestry 7:184
Similarity, meaning of 15:212
Similarity versus relationship in *Drosophila* 14:221
Simpson, G. G., works criticized 9:44
Siphonaptera 4:45
Sitta, and character displacement 5:49
Size of genera in three families of beetles 12:15
Skeletal morphology, of Salientia 6:70
Some axioms of taxonomy 13:109
Some bases for higher categories in classification 6:160
Some distribution patterns of Pacific Island faunae 5:11
Some future developments in taxonomy 12:151
Some nomenclatural effects of the Paris Congress 1:23
Some notes on phylogenetic principles 13:46
Some processes of numerical taxonomy in terms of distance 15:131
Some pselaphid beetles with boreal affinities and their distribution along the postglacial fringe 15:330
Some reflections on plylogenetic and typological taxonomy 9:37
Some remarks on nomenclature by Scudder, Haldeman, Gray and Baird (1860–1869) 13:96
Some remarks on Sokal and Sneath's *Principles of Numerical Taxonomy* 14:61
Some results of the 1961 Code of Nomenclature 12:39
Sorex 4:21
Sound spectrogram 11:76
Sources of error in locality data 14:344
South American freshwater fishes, trematode parasites of 12:45
Speciation and formation of genera in Acanthocephala 1:73
Speciation, in marine isopods 3:149
Speciation, in parasites 15:216
Speciation in the sea (review) 13:54
Species and systematics 5:1
Species, animal, living and fossil 3:169
Species density of North American recent mammals 13:57
Species, describing of 5:191
Species description, nature of 1:106
Species differences in amino acids of *Culex* mosquitoes 2:138
Species, genetic 3:54
Species, in plants, defined 2:184
Species, nature of 3:49
Species, nature of, in U.S.S.R. 3:66
Species, phenotypic 3:50
Species, phylogenetic 3:56
Species, synthetic natural populational 7:116
Specific categories, nomenclatorial treatment of 3:90
Specific names 15:350
Specific names, nomenclatural status of 11:139
Speculations on some beetles, barriers, and climates during the Pleistocene and pre-Pleistocene periods in some nonglaciated portions of North America 12:178
Spermophilus, chromosomes of 15:199
Spider wasps, systematics of 2:155
Spiders, as prey of wasps 2:155
Spiders, classification of 1:1
Spiders, genus *Textrix* 12:173
Spiders (Theridiidae) 8:107
Sponge genus *Reniera* 6:156
Sponges (Calcarea) 7:97
Sponges, ontogeny and systematics 6:174
Sponges, Pharetronida 10:45

Sporozoa 14:110
Spread potential and the colonisation of islands 6:41
Squirrel geography of the Indian subregion 9:1
SSZ news 1:39, 92, 139, 183
Stability in taxonomy 3:140
Stability of nomenclature 13:182
Standardization of higher systematic categories 5:42
Starfish 15:300
Statistics, morphological 11:142
Status of botanical nomenclature, the 8:22
Steatoda, spiders 8:107
Stejneger, L., biography 13:243
Sternum versus sternite 7:131
Stiles, C. W., biography 13:220
Storeria 14:306
Streptopelia, doves 8:48
Structural similarities in biology 11:45
Structure of the genital system of Pogonophora, the 10:24
Studies of choromsomes of some anuran amphibians (Hylidae and Centrolenidae) 14:139
Study of methods of color determination, a 5:147
Sturgeons, Caspian, races of 4:83
Stylopoidea 14:104
Subgenera and genera 2:135
Subspeciation 7:139
Subspeciation, in *Martes* 10:49
Subspecies, a partial subcategory of species 6:63
Subspecies and clines (symposium) 3:97
Subspecies and trinomials 3:92, 174
Subspecies category in mammals, the 3:99
Subspecies, comments on 4:93
Subspecies concept and its taxonomic application, the 2:97
Subspecies concept, criticism of 2:97
Subspecies, criticisms of 8:148
Subspecies, cross-breeding between 3:11
Subspecies, defense of 4:186
Subspecies, differentiation 8:142
Subspecies, discussion of trinomials 5:183
Subspecies, in birds 3:105, 4:35
Subspecies, in Collembola 7:8
Subspecies, in screech owls 12:8
Subspecies, not applicable to marten 7:1
Subspecies problem, comments on 7:111, 10:17
Subspecies, recognition of 3:4
Subspecies, taxonomy of 11:160
Subspecific boundaries, nature of 11:160
Subspecific nomenclature: the proposed method of Wilson and Brown 4:140
Subtribal names in zoology 6:193
Suggested changes in "A revised classification of the phylum Protozoa," with particular reference to the position of the haplosporidans 15:345
Suggestion for the standardization of the higher systematic categories, a 5:42
Summary and comment (symposium) 14:337
Summary (of symposium: subspecies and clines) 3:126
Supergeneric names 10:154
Superspecies 3:145, 4:143
Superspecies concept, the 15:245
Superspecies, of marine isopods 3:149
Superspecies, the 3:145
Supplemental list of members 1:42, 95, 188
Symmetry, in lower invertebrates 8:212
Sympatric (term discussed) 13:42
Sympatry, allopatry, and the subspecies in birds 4:35
Symposium: animal courtship patterns 4:97
Symposium: basic concepts of systematic order 8:48
Symposium: famous zoologists 13:195
Symposium: interactions of phyletic and phenetic taxonomies 14:174
Symposium: invertebrate classification and phylogeny 8:169
Symposium on Linnaeus and nomenclatorial codes 8:2
Symposium on nomenclature 1:171
Symposium: problems in the phylogeny of the Salientia 6:70
Symposium: subspecies and clines 3:97
Symposium: systematics, present and future. Introduction 8:59
Symposium: the biography of Baja California and adjacent seas 9:47, 93, 148
Symposium: the data of classification 11:49, 97, 145; 12:1
Symposium: the origin of higher levels of organization 14:245
Symposium: the philosophical basis of systematics 10:157
Symposium: the problem of intraspecific variation in parasitic animals 6:1
Synthetic natural populational species in biology, the 7:116
Syntopic (term discussed) 13:42
System of animal classification, reconstruction of 2:145
Systematic activity, in Amphipoda 7:123
Systematic Association, publications of 13:56
Systematic biology, nature of 1:106
Systematic botany, future of 8:76
Systematic categories, nature of 6:56
Systematic literature 7:174
Systematic position of the Branchiobdellidae (Annelida:Clitellata), the 14:25
Systematic serology 2:19
Systematic zoology 8:69, 82
Systematic zoology, quantitative and experimental methods in 1:97
Systematics and phylogeny 6:54
Systematics and phylogeny of the Protozoa 8:169
Systematics, and species 5:1
Systematics, basic questions of 6:53
Systematics in 1970: some unpopular predictions 10:157
Systematics, infraspecific 5:92
Systematics, nature of 1:26, 2:41
Systematics of ciliated Protozoa 5:121

Systematics, of insects, life history studies in 2:112
Systematics, of *Kalotermes* 2:76
Systematics, of parasitic worms 2:7
Systematics, of spider wasps 2:155
Systematics, of sponges 6:174
Systematics of the six-rayed sea star, *Leptasterias*, in the vicinity of San Juan Island, Washington 15:300
Systematics of vertebrate larvae, the 2:63
Systematics, present and future (symposium) 8:59

Tapeworm, *Thysaniezia giardi* 3:171
Taxo-genetic analysis of the status of *Rana kandiyohi* Weed, a 4:75
Taxonomic application of subspecies concept 2:97
Taxonomic characters and infraspecific variation in mollusks 7:48
Taxonomic characters in Mollusca 5:144
Taxonomic distance 10:70
Taxonomic gaps 6:166
Taxonomic hierarchy 11:139
Taxonomic keys, construction of 3:38
Taxonomic method, comments on 3:65
Taxonomic methods, their bearing on subspeciation 7:139
Taxonomic punched cards 3:143
Taxonomic recognition of variation in Opiliones 2:173
Taxonomic register 10:80
Taxonomic relationships, description of by factor analysis 11:1
Taxonomic significance of gaps in pelecypod morphology, the 5:143
Taxonomic similarity, measure of 10:70
Taxonomic theory 14:73
Taxonomic value of biochemical characteristics of animals with reference to amino acids 14:33
Taxonomists, criticism of 3:177
Taxonomist's glossary of genitalia in insects (review) 7:93
Taxonomy and evolution 13:119
Taxonomy, axioms of 13:109
Taxonomy, comments on 11:92
Taxonomy, evolutionary, generic 5:97
Taxonomy, future developments in 12:151
Taxonomy, hierarchy in 11:139
Taxonomy in the *Treatise on Invertebrate Paleontology* 14:133
Taxonomy, methodological problems in 13:19
Taxonomy, non-Linnean 14:1
Taxonomy, numerical 13:32, 98, 100, 102, 106
Taxonomy, numerical, comments on 11:180, 186
Taxonomy, of birds 3:105
Taxonomy of gophers, especially *Thomomys* in Chihuahua, Mexico 15:189
Taxonomy, of oysters 3:21, 134
Taxonomy, of plants 2:180; 8:59, 76; 10:159
Taxonomy, of Protozoa 10:179, 15:229
Taxonomy, of Sarcodina 15:229
Taxonomy of the salivary glands of vertebrates 7:74
Taxonomy, operational 14:178
Taxonomy, phylogenetic, and biological species 10:42
Taxonomy, phylogenetic and typological 9:37
Taxonomy, purposes of 12:152
Taxonomy, stability in 3:140
Taxonomy, theoretical and quantitative 10:118
Teleostean fishes, classification of 8:160
Temporal variation in *Tetraopes* 13:161
Tergum versus tergite 7:131
Terminology for the gonopods of the American river crabs, a 13:28
Terminology of microgeographic races in mammals 4:179
Terminology of structural and functional similarities, the 11:186
Termites, systematics of 2:76
Terms tergum and sternum, tergite and sternite, the 7:131
Terrestrial and fresh-water biotas, of Baja California 9:148
Terrestrial flatworm well established outdoors in the northeastern United States, a 9:33
Tetrahymena, taxonomy of 12:175
Tetraopes tetraophthalmus 13:161
Textrix (spider genus), familial affiliation of 12:173
Theoretical taxonomy 10:118
Theory of definitions 15:127
Thomomys, gophers 15:189
Thoughts on systematic work in outlying areas 14:59
Thrushes, *Catharus* and *Hylocichla* 5:174
Thryothorus 14:48
Tiger moth, scarlet, evolution of 11:17
Toads, classification of 11:72
Tracheal system as a systematic character in larval Diptera, the 8:130
Transliteration of Greek to Latin in the formation of names of zoological taxa 5:65
Transliteration of Greek words 5:65, 6:194
Trematodes, in frogs 12:65
Trematodes of South American freshwater fishes, zoogeographical affinities of 12:45
Trinomen, a case for 5:183
Trinomen, case against 3:174
Trinomials and subspecies 3:92
Trivial names 2:42
Tundra, Canadian arctic 14:55
Two evolutionary terms 13:50
Two new evolutionary terms for speciation in parasitic animals 15:216
Two taxonomies: areas of agreement and conflict, the 14:176
Type localities, revision of 2:37
Typological taxonomy 9:37
Typology 8:117
Typology, and phenetic classification 10:176

Uniform endings and the revival of interest in taxonomy 2:191
Uniform endings for the names of higher taxa 7:134
Uniform endings, in taxonomy of Protozoa 5:79
Uniform endings in zoological nomenclature 1:20
Uninominal nomenclature 13:182; 14:144, 346
Uninominal nomenclature, notes on 14:346
Unprecedented for zoologists 3:181
Unrecorded papers of Rafinesque and Jacob Green 9:35
Ursus, bears 14:310
U. S. National Museum, Proceedings, 1890–1897, preprints of 1:86
Utilitarian aspects of supergeneric names 10:154
Utilization of X-rays as a tool in systematic zoology 6:29

Variability, measurement of 15:141
Variant populations, naming of 3:119
Variation, abnormal, in Notostraca 7:84
Variation, geographic, and subspecies in butterflies 5:110
Variation in North American screech owls and the subspecies concept 12:8
Variation, in Opiliones 2:173
Variation, in parasitic Acarina 6:24
Variation, in parasitic flatworms 6:7
Variation, in parasitic nematodes 6:19
Variation, in parasitic Protozoa 6:2
Variation, in shrews 4:21
Variation, in *Tetraopes* beetles 13:161
Variation, in tropical beetles 14:53
Variation, infraspecific, in frogs 3:111
Variation of hemipenis and cloaca in the colubrid snake *Calamaria lumbricoidea* 11:32
Vertebrate larvae, systematics of 2:63
Vertebrate speciation (review) 12:43
Vertebrates, marine, of Baja California 9:134
Vertical distribution, of fish, *Chauliodus* 1:113
Vertical migration, of oceanic plankton 10:10
Viruses, code of nomenclature 8:27

Wasps, Pompilidae, ethology of 2:155
Water mites 6:137
Weismann, A., biography 13:215
Western ground squirrels 3:82
What are the basic principles of classification based on comparative cytology? 13:44
What is species describing? 5:191
What is the subspecies problem? 7:111
What of taxonomy in 1970? 11:92
Whither zoological nomenclature? 6:107
Worms, parasitic, systematics of 2:7

X-rays, use in systematic zoology 6:29

Zoogeographical affinities of trematodes of South American freshwater fishes, the 12:45
Zoogeography, of Central Europe 15:46
Zoogeography of North Atlantic and North Pacific ampeliscid amphipod crustaceans, the 14:119
Zoogeography, of squirrels 9:1
Zoogeography of the bathypelagic fish, *Chauliodus* 1:113
Zoogeography of the coleopterous family Chaulioognathidae 10:140
Zoogeography of the Near East 4:49
Zoological names, diacritical marks in 1:84
Zoological names, emendation of 1:178
Zoological nomenclature, cooperative versus personal decisions on 6:101
Zoological nomenclature, future of 6:107
Zoological Record, notice 15:306
